

PARTICIPATE IN BATTELLE'S UPCOMING IUPAC LUNCHEON SEMINAR

Monday, August 11th
12:00 -13:30 pm

Post-merger Integration of R&D: Key Steps to Realizing its Full Potential (Sponsored by Battelle)

During this luncheon, Dr. Denise Manker, Director, Agronomic Development of Biologics, Bayer CropScience AG, will discuss (1) challenges in successfully integrating R&D activities following a merger where cultural differences must be considered, and (2) determining the key processes needed to realize the melded team's full R&D potential.

Battelle's Vice President of Agribusiness, David Nothmann, will introduce Dr. Manker.

About Battelle's Agribusiness group: From precision farming methods to complex environmental fate projects, Battelle is solving the problems that matter most to companies that feed the world. We deliver innovative agribusiness solutions that lead to new products and boost existing product productivity while maintaining safety and sustainability within the global food system. Expert scientists at our facilities in the U.S. and Europe perform an array of testing and analysis (GLP and non-GLP compliant), develop new products and provide regulatory and risk assessments.
